

Round 1

What mobile framework are you targeting?

The cold calling app — what platform/stack is it on, and how do you want it connected?

You mentioned "exit AI" for lead enrichment — did you mean Exa AI, Clay, Apollo, or something else?

For LinkedIn lead scraping, which approach do you want? (Phantombuster, Apify, LinkedIn Sales Nav API, Playwright, RapidAPI)

For LinkedIn, Facebook, and Instagram DMs — unofficial/automation, official APIs only, or a mix?

What email sending provider do you want to use?

Is this a web dashboard + mobile app, mobile only, or mobile first?

Roughly what scale are you targeting at launch?

Is this internal-only or a SaaS product for clients?

Round 2

Web app framework — Next.js + Supabase?

What is the existing King Circle dashboard built on?

Do you want Claude to auto-generate personalized outreach copy per lead?

How complex does the lead pipeline/CRM need to be?

For Google Maps scraping — what type of businesses are you targeting?

Do you want automated multi-step outreach sequences or single-shot messages?

For Apify — LinkedIn leads, Google Maps leads, or both?

Want to lock in an email provider now?
